

The Problems with Unprotected Gutter Systems

Gutters become clogged when leaves and debris fall onto the roof and accumulate in the gutters. During rainfall, the debris in gutters cause downspouts to clog and gutters to overflow. LeafX™ helps prevent:

- Clogged, overflowing gutters
- Mold in attic & basement
- Water damage to fascia & soffit
- Ceiling stains & damage
- Falling – 136,000 admitted to ER every year
- Foundation & landscape damage
- Snow & ice damage

LeafX™ offers the best warranty in the industry – a lifetime NO-CLOG GUARANTEE for your gutters. See actual warranty for details.

Color Options

We offer 14 colors and copper. Actual colors may vary.

is an effective and affordable solution

- A. The nose-forward cover extends past the gutter lip, allowing water to follow the curve of the hood and flow into the gutter, while leaves and debris are effectively shed.
- B. The Flex-Drain collects additional water through the vertical perforations and bends to allow your system to custom fit to your exact roof pitch.
- C. The preset opening keeps water where you want it – flowing through your gutters.
- D. The low-profile design and variety of matching colors available combine to enhance the appearance of your home.
- E. The ridges slow water, forcing it to sheet rather than flow in streams. The ridges also strengthen the system, allowing LeafX™ to handle the heaviest snow and ice loads.
- F. Factory preset installation guides allow fasteners to be recessed, thereby maintaining a seamless and uniform appearance.
- G. Unobstructed gutter allows water to flow freely.
- H. Handles any rainfall on record.
- I. Made of heavy duty aluminum.

Why LeafX™ is Better

- LeafX™ is guaranteed to work for life. Compare this guarantee to that of any other system.
- Installs in 4-ft panels that are easy to replace in the event of damage from falling tree limbs.
- No danger of voiding your roof warranty since LeafX™ screws directly into your gutter and interlocks with adjoining panels. Absolutely no brackets, screws, or nails into your roof!
- Custom fits new or existing gutters of any size or style.
- 100% aluminum end caps and miters completely enclose the system to keep out debris and animals.
- LeafX™ is the best value of any premium gutter protection system.

LeafX™ Warranty

LeafX™ is confident in offering the best warranty in the industry.

- Only offered through authorized installation specialists
- Lifetime NO-CLOG GUARANTEE for your gutters
- Lifetime finish warranty
- Fully transferable

Fits Any Roof Pitch

Standard LeafX™ panels will work on anything up to a 16/12 roof pitch. Specialized high water flow panels can be used on anything steeper.
